GUEST PRESENTATION

- 1.) Susan Eccher, Military and International Services Regional Manager, American Red Cross, Northeast Region.
 - A. The Red Cross has a program called Restoring Family Links
 - B. This program helps reconnect thousands of families by locating missing loved ones separated by armed conflict or disaster internationally
 - C. The process of locating a family member can start two ways: someone from the US is seeking to locate a family member internationally or someone internationally is seeking to locate a family member stateside
 - D. Some of the tools they use to locate someone is by Red Cross sending an “open letter” containing only family news or picture (nothing political is allowed) or by completing a tracing request (this is done when the member doesn’t know the general location of where they can be found). They also do Health and Welfare messages when contact has been lost abruptly
 - E. Respect and confidentiality is also given to the family member who they are trying to locate, to inform the family member whether or not they want to be found or not
 - F. Red Cross can also assist with Certificates of Detention (The ICRC), International Committee of Red Cross, can go into any international detention centers and get proof or Certificate of Detention for a prisoner. They replace travel documents (one-time service) for people seeking permanent resettlement in a third country
 - G. Red Cross assistance is based on humanity, the human need, impartiality, neutrality, universality, unity, voluntary services, and independence
 - H. The program Restoring Family Links can be a great resource for those refugees who have lost contact with their family members and wish to find them

 - LSS is referring IAS clients to CCB
- **Jacksonville Area Legal Aid:**
 - Cubans with electronic devices, are not being given Parolee status anymore and they will not be able to adjust through the Cuban Parole Act. They will now need to present with credible fear for Asylum. With the devices they are given a notice to appear for removal proceedings
 - I730- Principles only have two years to request for family to come over for free. After those two years they will be charged \$535.00 and have to prove they can afford to bring their relatives to the US. Only the Principle on the transportation card can petition for family members in the first two years
 - M648- The Medical Exemption for the Citizenship test (cognitive impairment). Refugees need to be careful in applying for this and be sure whoever is completing the form is not just making a boilerplate application. A medical doctor must complete them and what is put on there cannot be changed. A lot of these applications are saying a person can't take the test because of high blood pressure other non -cognitive diseases. The Pulido group is charging \$300.00 for these documents and they are not correct
- **Early Learning Coalition:**
 - No updates
- **Department of Health**
 - They are streamlining the clinic to be more efficient and to have staff busy all day on the refugee days. Mondays will be lab days and Wednesdays, Thursdays, and Fridays will be for assessments until January 16, 2019.
 - They are still accepting walk-ins for immunizations at anytime

- Both Labs and Health Assessment must be completed within 90 days of their arrival to US
- Clarification: Refugees have one year to complete immunizations free of cost. After the first year they will have to pay
- It is also important they stick to their immunization schedule. A patient can be complete in his/ her schedule with 8 mons if they keep up their immunization schedule
- Adult vaccines are not covered by Medicaid, they are strictly paid for by the Refugee Program, so if they don't get their immunizations completed within the first year they will have to pay out of pocket.
- Only 1 MMR vaccine will be required for hereon
