E. Use of Evidence-Based Practices:

BBHC conducts an annual EBP Survey to assess implementation of any new models being implemented in Broward County. In addition to names of EBPs, the survey asked about who in the agency is trained, how they measure fidelity, and what community-defined evidence practices our county has developed to address local disparities. The survey was completed by **31 organizations** that included contracted providers and some of their subcontractors in June 2019. The **101 evidence-based practices** delivered by BBHC providers include:

EBP	Providers Implementing the EBP	EBP	Providers Implementing the EBP

F. Consumer Travel to Services:

BBHC is responsible for one county that is accessible via transportation within a 30-mile radius north/south and east/west. The only services for which clients may need to find outside the county is Residential Substance Abuse Treatment for youth, found South in Miami-Dade County and consumers needing a Forensic Alternative Center must also leave the county.

G. Unmet Needs Identified through Coordination of Care Activities:

Survey responses from the three respondent groups identified housing as a need for all populations. The need is for permanent, supported housing, transitional housing, and emergency housing. For those consumers who do not meet the SPDAT score criteria for a designation of "homeless", the options are limited. There needs to be an increased availability of subsidized housing that is not linked to a voucher, mandatory case management or SMI diagnosis.
