

# CCBHC Model

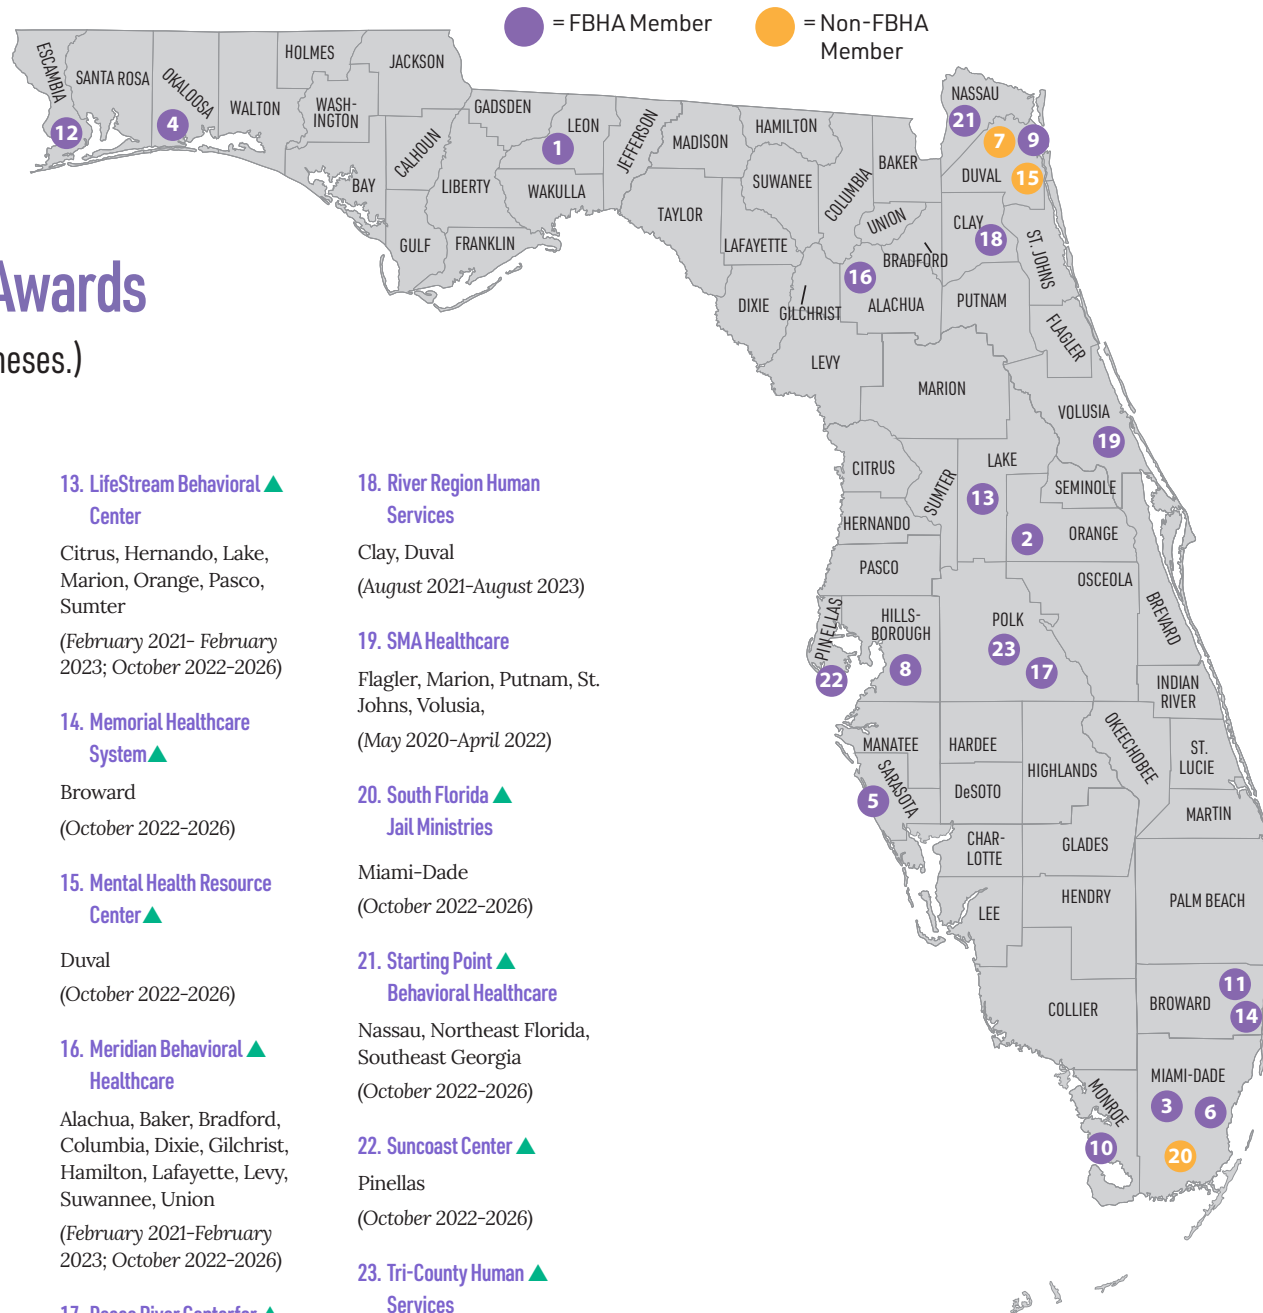

Certified Community Behavioral Health Clinics (CCBHCs) are non-profit organizations that provide integrated health care for individuals and families with behavioral health conditions who are underserved, indigent, insured, uninsured, or on Medicaid, regardless of ability to pay. They provide a minimum of nine types of services directly, or through contract with partner organizations, with an emphasis on the provision of 24-hour crisis care, evidence-based practices, care coordination and integration with physical health care.

**This is system transformation, not another “new program.” The CCBHC Model is built on the concept that the way to expand and improve behavioral health care is to pay for the activities that make those goals possible! How is this accomplished?**
