EXECUTIVE SUMMARY

This 21st Annual Sheriffs' Peer Review Report complies with section 39.3065(3)(d), Florida Statutes (F.S.), concerning quality performance, outcome-measure attainment, and cost efficiency. A team of peer reviewers from sheriffs' offices and the Department complete casework audits on closed investigations as a component of the annual evaluation. The Florida Legislature approved the Accountability Act for the Department of Children and Families, which in part, codified the Quality Office, and moved the date of the annual report to November 1 of each year.

The seven sheriffs' offices conducting child protective investigations (Broward, Hillsborough, Manatee, Pasco, Pinellas, Seminole, and Walton) encompass metropolitan areas where more than a quarter of the state's child population resides. A total of 224,458 child protective investigations were conducted in Florida during Fiscal Year (FY) 2020-21¹ and the seven counties where sheriffs' offices handle investigations conducted 43,894 (19.71%) of the state's investigations. The longstanding commitment of the sheriffs' offices involved in child protective investigations toward engaging families, protecting children, and working in partnership within their communities remains consistent and strong. These offices are an essential partner in moving forward with shared values, principles, and efforts the Department seeks for enhancing Florida's child protection system.

With the implementation of the Quality Office, monitoring instruments have been revised to include Life-of-Case Reviews that occur at designated key points during open investigations. The review is conducted on open cases to allow for real-time adjustments, if needed, to change the course of an investigation to ensure child safety. The annual peer review uses the same monitoring instrument for a statistically significant sample of investigations closed during the prior year. The review teams consist of members from each sheriff office and representatives from the Department to increase consistency across each review site.

Section 39.3065(3)(b), F.S., requires sheriffs' offices to operate in accordance with performance standards and outcome measures established by the Legislature. Child protection and child welfare outcomes are established in section 409.986(2), F.S. Both measures listed below are included in the sheriffs' grant agreements:

- Percent of investigations commenced within 24 hours: Target 99.5%.
 - Department performance: 99.71%
 - Sheriffs' office performance: 99.5%
- Percent of victims seen within 24 hours of receiving a report: State target 90%, Sheriff Target: 85%.
 - Department performance: 93.35%
 - Sheriffs' office performance: 93.31%

Prior Sheriff's Annual Performance Reports are available to view and download at the Florida's Center for Child Welfare: <http://centerforchildwelfare.fmhi.usf.edu/MandatedReportsLegislature.shtml>.

SECTION I: SHERIFFS' INVOLVEMENT IN CHILD PROTECTIVE INVESTIGATIONS

Sheriffs' offices in Broward, Hillsborough, Manatee, Pasco, Pinellas, Seminole, and Walton counties are authorized under section 39.065, F.S., to conduct child protective investigations in their respective counties. Child protective investigations are initiated upon receiving a report of known or suspected child abuse, abandonment, or neglect at the Florida Abuse Hotline. The Florida Abuse Hotline accepts five types of child intake reports:

1. In-home reports alleging maltreatment by a child's caregiver
2. Institutional reports alleging maltreatment of a child by another person responsible other than the child's caregiver (i.e., incident at school, childcare facility, etc.)
3. Child-on-child referrals alleging inappropriate sexual behavior or an alleged juvenile sexual offense
4. Human Trafficking allegations
5. Special condition referrals that include Parent Unavailable, Parent in Need of Assistance (PNA), and Foster Care Referrals

The Florida Abuse Hotline is required to refer allegations of criminal conduct to the law enforcement agency of the municipality or county in which the alleged conduct has occurred. These criminal allegations are not considered child protective investigations and, therefore, are not included in this report.

Child Population

During FY 2020-2021, 27.28% of Florida's child population resided in a county where the sheriff's office performs child protective investigations. The seven sheriffs' offices received 19.71% of initial and additional reports and special condition referrals. This totaled 43,894 reports and special condition referrals for the respective sheriffs' offices.

*CBCs receive reports regarding children in their care, such as foster home licensing issues, safety plan concerns, or placement disruptions.

Child Reporting Rates

Child reporting rates increased as children began returning to the classroom in early 2021 after a year of partial school closures due to COVID-19.

Month	Child Report Rate Per 1,000
Jul-20	3.02
Aug-20	3.03
Sep-20	3.12
Oct-20	3.58
Nov-20	3.37
Dec-20	3.64

Jun-21	3.90
12 Month Sum FY 2020-2021	41.75
Monthly Average FY 2020-2021	3.48

Source: DCF FSN Monthly Reports: Child Investigations Received by Intake Sequence Type – Statewide by Agency and/or County

Monthly data on the reporting rates (initial and additional reports) received per 1,000 child population show a general increase year to year. However, COVID-19 significantly affected the reporting rates for FY 2019-2020 and for part of FY 2020-2021. Teachers and school personnel are one of the largest groups of mandatory reporters. Since the return to school for many children beginning in mid-2021, those rates have begun to rise again.

Fiscal Year	Annualized Child Reporting Rate Per 1,000
2020-2021	41.75
2019-2020	39.29

Source: DCF FSN Monthly Reports: Child Investigations Received by Intake Sequence Type – Statewide by Agency and/or County

² Each sheriff's office also handles various requests received from other states and/or other counties for child protective investigative assistance. Most requests include obtaining records, conducting a child-welfare check, verification of information, emergency home studies, etc. The work volume associated with such in-state requests (also known as out-of-town inquiries or OTIs) and inter-state requests varies from county to county but is estimated by the sheriffs' offices to account for an average of ten percent of incoming casework assigned to child protective investigators. These requests for assistance are not officially tabulated or captured by the Department as a workload element when capturing active caseloads.

The seven sheriff's offices were responsible for 43,894 initial intake and additional reports and special condition referrals during FY 2020-2021, or 19.71% of the statewide total. This is a decrease of 791 reports from FY 2019-2020

Incoming Reports and Special Conditions by Type by County

The tables on the following pages provide data for each of the seven sheriffs' offices for incoming reports by type and special condition referrals by type. The tables list the statewide percentage of child and special condition reports that the respective county received. The term "initial" refers to in-home and institutional investigations received on a child. The term "additional" references new allegations concerning a child that are received during a timeframe in which there is already an open and active initial investigation. "Special condition" referrals include:

- child-on-child sexual abuse;
- parent seeking assistance; and
- child is without custodial care or supervision as the caregiver/parent is reported unavailable.

Broward Sheriff's Office

Broward Sheriff's Office received 11,366 child investigations and special condition referrals, which averaged 947.17 reports and special condition referrals monthly in FY 2020-2021. Special Condition referrals accounted for 6.81% of the intake workload. Broward County had a monthly average of 2.15 intake reports received per 1,000 children residing in the county. Note: The rate of reports excludes special condition referrals.

Walton County Sheriff's Office

Walton County Sheriff's Office received 1,170 child and special condition reports, which averaged 97.5 reports and special condition referrals monthly in FY 2020-2021. Special Condition referrals accounted for 6.5% of the intake workload. Walton County had a monthly average of 6.2 intake reports received per 1,000 children residing in the county. Note: The rate of reports excludes special condition referrals.

SECTION II: PEER REVIEW PROCESS

Section 39.3065 (3)(d), F.S., requires the sheriff's program performance evaluation be conducted by a team of peer reviewers from the respective sheriffs' offices that perform child protective investigations and representatives from the Department. The peer review was completed in Fall of 2021.

Sampling Methodology

The peer review was conducted on a sample of investigations closed during the period January 2021 to June 2021. Per new language in section 39.3065(e)(2), Florida Statutes, the department selected random cases for the peer review sample. The sample criteria for case selection included children ages 0-5 and investigations with a substance misuse maltreatment. The Life-of-Case monitoring instrument was used to complete the review. The Quality Office developed this review tool based on requirements from the Federal Child and Family Services Review, Rapid Safety Feedback Reviews, the previous peer review tool, special reviews, and instruments from other states. This one unified instrument is used for all ongoing reviews of child protective investigations. The ratings for the file reviews use a "Yes/No/Not Applicable" approach. Additional functionality was built into the instrument to allow for deeper analysis for any "No" ratings to help drive improvement activities.

SECTION III: OUTCOME MEASURE ATTAINMENT

Section 39.3065(3)(b), F.S., requires sheriffs' offices to operate in accordance with performance standards and outcome measures established by the Florida Legislature. Child protection and child welfare outcomes are established in section 409.986(2), F.S. The General Appropriations Act sets forth appropriations allocated through multi-year grant agreements with the seven sheriffs' offices performing child protective investigations. The current grant agreements cite two performance measures for the sheriffs' offices. Users enter the data for these performance measures and others into Florida's statewide automated child welfare information system, FSFN. This system produces management reports used for determining statewide performance and outcomes.

The FSFN management report, "Leader Board for Investigations," provides the data for the two performance measures included in the sheriffs' grant agreements. The FSFN report lists performance for each department region and sheriff's office that operates a child protective investigation program. The algorithms for calculating the outcome measures are established by the Department. The algorithms are as follows:

- **Investigations commenced within 24 hours:** The numerator is the number of reports commenced within 24 hours of receipt of the report. The denominator is the total number of reports closed in the report period.
- **Victims seen within 24 hours of report received:** The denominator is the number of victims listed in recorded reports. The numerator is the total number of victims seen within 24 hours as recorded in the FSFN computer system.

Performance Measure 1: Percent of investigations commenced within 24 hours [Target Goal – 99.5%]

FSFN captures this performance measure on reports coded in-home and institutional. The special condition referrals and reports closed as "duplicate" or "no-jurisdiction" are not applicable to this measure. Florida Administrative Code (F.A.C.) references this performance measure as does section 39.201(5), F.S., which states, in part:

If it appears that immediate safety or well-being of a child is endangered, that the family may flee, or the child will be unavailable for purposes of conducting a child protective investigation, or that the facts otherwise so warrant, the Department shall commence an investigation immediately, regardless of the time of day or night. In all other child abuse, abandonment, or neglect cases, a child protective investigation shall be commenced within 24 hours after receipt of the report.

Commencement of Investigations within 24 Hours

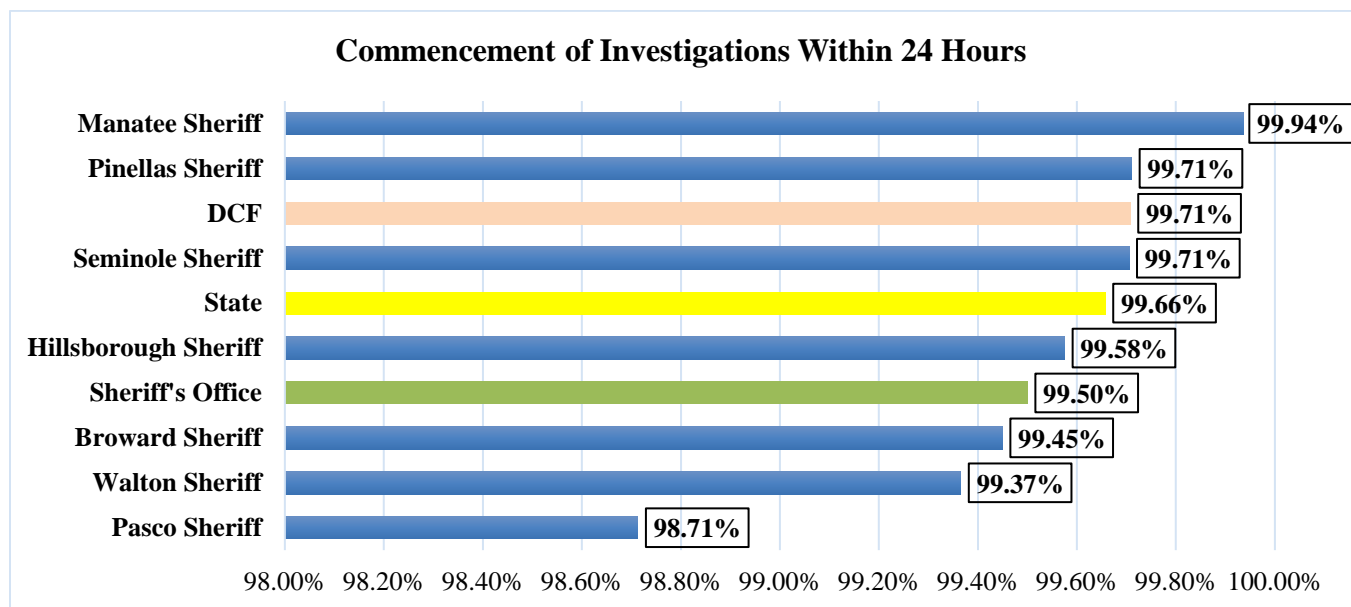

In FY 2020-2021, there was a total of 224,458 initial and additional reports as well as special condition referrals statewide. Of this number, 149,056 (66.93%) were regular initial abuse reports; 14,423 (6.88%) were special condition referrals, and 17,085 (6.48%) were additional reports. All of these required an initial 24-hour or immediate response with the following exceptions:

1. "Parent Needs Assistance" referrals may be handled outside of the customary 24-hour, face-to-face commencement response, as permitted by department protocol.
2. "Foster Care Referrals" (FCR) may be commenced within 48 hours if initial circumstances warrant, as permitted by department protocol.

Calls received by the Florida Abuse Hotline with supplemental information (with no new/additional victims, alleged perpetrators, or allegations of harm on open investigations) were not referenced or added to the total number of reports received, since supplemental reports do not require an additional commencement or face-to-face visit by the child protective investigator. There were 31,058 supplemental reports added to open investigations in FY 2020-2021, averaging 2,218 supplemental reports accepted monthly.

FSFN performance reports exclude special condition referrals from being included in the data tracking on this measure. Therefore, this data would exclude child-on-child sexual abuse referrals, foster care referrals, parent unavailable referrals, and parent needs assistance referrals. The data provided also excludes those report commencements that are associated with an additional report and investigations closed as being a duplicate or no-jurisdiction.

FSFN data includes only initial commencements. This data is based on those initial reports that closed each month. If the data reflected a commencement within 24 hours of report acceptance, the commencement would be within compliance.

Victims Seen Within 24 Hours

Sheriffs' grant agreements include the performance measure of 85% of child victims being seen within 24 hours of the receipt of a report. FSFN captures this performance measure on reports coded in-home and institutional. The special condition referrals and reports closed as "duplicate" or "no-jurisdiction" are not applicable to this measure. The sheriffs' offices collectively performed at 93.31%, DCF at 93.35%, with a statewide performance of 93.34%. The DCF internal target for this item is 90%.

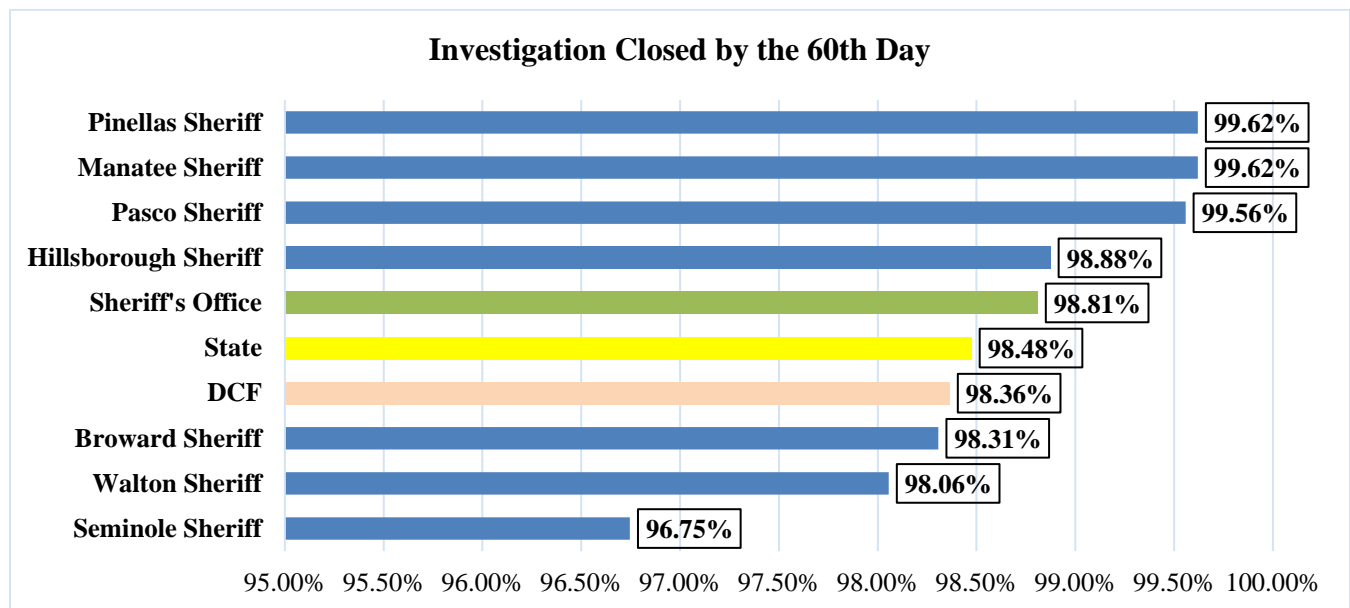

Source: DCF CPI Scorecard Dashboard July 2020– June 2021

Investigation Closed by the 60th Day

FSFN captures this performance measure on reports coded in-home and institutional. Special condition referrals, duplicate, and no-jurisdiction reports are not applicable to this measure. The basis for this performance measure is section 39.301(16), F.S., which states, *the department shall complete its protective investigation within 60 days after receiving the initial report, unless:*

- (a) There is also an active, concurrent Criminal investigation that is continuing beyond the 60-day period and the closure of the protective investigation may compromise successful criminal prosecution of the child abuse or neglect case, in which case the closure date shall coincide with the closure date of the Criminal investigation and any resulting legal action.*
- (b) In child death cases, the final report of the medical examiner is necessary for the department to close its investigation and the report has not been received within the 60-day period, in which case the report closure date shall be extended to accommodate the report.*
- (c) A child who is necessary to an investigation has been declared missing by the department, a law enforcement agency, or a court, in which case the 60-day period shall be extended until the child has been located or until sufficient information exists to close the investigation despite the unknown location of the child.*

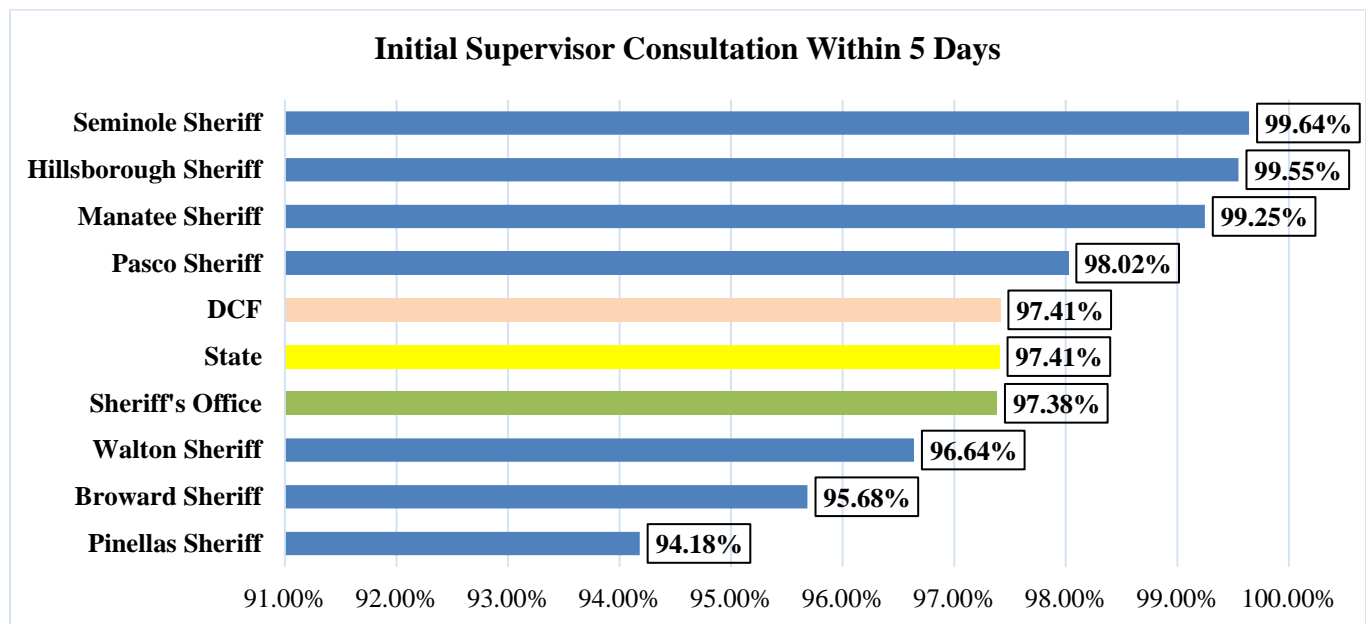

During fiscal year 2020-2021, the sheriffs' offices collectively performed at 98.81%, DCF at 98.36%, with a statewide performance of 98.48%.

SECTION IV: COST EFFICIENCY

This section provides an assessment of the cost efficiency based on the cost for initial and additional reports for the sheriffs' offices and department regions. The table below provides expenditures and costs per report received during FY 2019-2020 and FY 2020-2021. Dividing actual expenditures by the number of reports received determines the cost per report, not using averages.

The cost for sheriffs' offices ranged from a low of \$989 to a high of \$1,744 with an overall average cost of report for sheriffs of \$1,431. The cost for the department ranged from a low of \$1,142 to a high of \$1,559 with an overall average cost of \$1,376 per investigation. The overall difference in cost between the sheriffs' offices and the department was \$139 per report.

	Fiscal Year 2019-2020*			Fiscal Year 2020-2021**		
AGENCY	Cost	Reports	Cost Per Report	Cost	Reports	Cost Per Report
Broward	\$14,846,068	10,310	\$1,440	\$14,264,123	9,359	\$1,524
Hillsborough	\$13,494,847	10,656	\$1,266	\$13,738,636	9,571	\$1,435
