TERMS AND DEFINITIONS

Terms	Description

SCOPE

INITIAL REQUEST & ASSUMPTIONS

Business Statement

DCF requires an update to the TEDS Extract code to align with recommendations made by Hendall.

Scope Definition

For admissions TEDS extract

- If Substance Use (Secondary) is 'None' (01), then Substance Use (tertiary) should be 'None' (01)
- If Substance Use (tertiary) is 'None' (01), then Route of administration (tertiary), Frequency of use (tertiary), and Age of first use (tertiary) should be 'not applicable' (96).
 - **Substance Use-** Mds14CTertiarySubstanceCode
 - **Route of Administration-** Mds15CTertiaryRouteOfIntakeCode
 - **Frequency of Use-** Mds16CTertiaryFrequencyCode
 - **Age of First Use-** Mds17CTertiaryAgeFirstUseNumber
- For Medication-assisted opioid therapy, if client has MAT as a service, this should be a yes. If client does not have MAT, then this should be a no. There should not be any unknown.

- **Medication-Assisted Opioid Therapy-** Mds190pioidReplacTherapyCode
- Pregnant at admission should not have any unknown.
 - **Pregnant at Admission-** Suds06PregnantAtAdmissionCode
- TEDS Extracts are generating '7' for the field 'Suds18DiagnosticCodeSetIdentifierCode' if there is no diagnosis (for substance use patients)
 - Does DCF want to update the code to always send Suds18DiagnosticCodeSetIdentifierCode = '3' which equals ICD-10? Yes

Assumptions, Constraints, Dependencies

-

EXISTING FUNCTIONALITY

Currently FASAMS TEDS extract includes unknown codes when unknown code should not be included.

PROPOSED FUNCTIONALITY

Update FASAMS TEDS extract per Hendall recommendations to not display any unknown codes for Substance used, Medication-Assisted Opioid Therapy, and Pregnant at Admission, and Diagnosis Code change.
