#### **5. Certification Regarding Environmental Tobacco Smoke**

Public Law 103-227, also known as the Pro-Children Act of 1994 (Act), requires that smoking not be permitted in any portion of any indoor facility owned or leased or contracted for by an entity and used routinely or regularly for the provision of health, daycare, early childhood development services, education or library services to children under the age of 18, if the services are funded by Federal programs either directly or through State or local governments, by Federal grant, contract, loan, or loan guarantee. The law also applies to children's services that are provided in indoor facilities that are constructed, operated, or maintained with such Federal funds. The law does not apply to children's services provided in private residence, portions of facilities used for inpatient drug or alcohol treatment, service providers whose sole source of applicable Federal funds is Medicare or Medicaid, or facilities where WIC coupons are redeemed.

Failure to comply with the provisions of the law may result in the imposition of a civil monetary penalty of up to \$1,000 for each violation and/or the imposition of an administrative compliance order on the responsible entity.

By signing the certification, the undersigned certifies that the applicant organization will comply with the requirements of the Act and will not allow smoking within any portion of any indoor facility used for the provision of services for children as defined by the Act.

The applicant organization agrees that it will require that the language of this certification be included in any subawards which contain provisions for children's services and that all subrecipients shall certify accordingly.

The Public Health Services strongly encourages all grant recipients to provide a smoke-free workplace and promote the non-use of tobacco products. This is consistent with the PHS mission to protect and advance the physical and mental health of the American people.

<sup>5</sup>Prevention other than Primary Prevention

<sup>6</sup>For the purpose of determining which states and jurisdictions are considered "designated states" as described in section 1924(b)(2) of Title XIX, Part B, Subpart II of the Public Health Service Act (42 U.S.C. § 300x-24(b)(2)) and section 45 CFR § 96.128(b) of the Substance use disorder Prevention and Treatment Block Grant (SUPTRS BG); Interim Final Rule (45 CFR 96.120-137), SAMHSA relies on the AtlasPlus HIV data report produced by the Centers for Disease Control and Prevention (CDC), National Center for HIV/AIDS, Viral Hepatitis, STD and TB Prevention (NCHHSTP). The most recent AtlasPlus HIV data report published on or before October 1 of the federal fiscal year for which a state is applying for a grant is used to determine the states and jurisdictions that will be required to set-aside 5 percent of their respective SUPTRS BG allotments to establish one or more projects to provide early intervention services regarding the human immunodeficiency virus (EIS/HIV) at the sites at which individuals are receiving SUD treatment services. In FY 2012, SAMHSA developed and disseminated a policy change applicable to the EIS/HIV which provided any state that was a "designated state" in any of the three years prior to the year for which a state is applying for SUPTRS BG funds with the flexibility to obligate and expend SUPTRS BG funds for EIS/HIV even though the state's AIDS case rate does not meet the AIDS case rate threshold for the fiscal year involved for which a state is applying for SUPTRS BG funds. Therefore, any state with an AIDS case rate below 10 or more such cases per 100,000 that meets the criteria described in the 2012 policy guidance will be allowed to obligate and expend SUPTRS BG funds for EIS/HIV if they chose to do so and may elect to do so by providing written notification to the CSAT SPO as a part of the SUPTRS BG Application.

<sup>7</sup>This expenditure category is mandated by Section 1243 of the Consolidated Appropriations Act, 2023

The amount in Row 2 for the SABG Primary Prevention is the total of Table 5a + Table 6 primary prevention. 7/24/2024 KG

Florida utilizes the Recovery Oriented Systems of Care (ROSC) model, therefore recovery supports are factored into treatment and discharge planning and are often bundled services. The current state accounting system does not capture these services in a manner that breaks this

information out. However, these services are captured in the data system through coding. The Department is currently working to develop a methodology utilizing the data coding to capture recovery activities in a fiscal manner. NW

Managing Entity financial reconciliation is in process but will not be complete prior to due date of submission. This fiscal year-end reconciliation will determine how much ARP funding will be available. The Department will update this column after the finalized amounts are determined. NW

Please enter the total amount of the SUPTRS BG, COVID-19, or ARP funds expended for each activity. Only complete this table if the state plans to fund subrecipient agency expenditures for non-direct services/system development with SUBG or SUPTRS BG, COVID-19, and/or ARP supplemental dollars. Grantees should not include on Table 6 the SSA expenditures of up to 5% that is allowed for the SSA cost of administering the grant. Non-direct services/system development activities exclude expenditures through funding mechanisms for subrecipients providing treatment "direct service" or primary prevention efforts themselves, that are listed on Table 7. Instead, these Table 6 subrecipient agency expenditures provide support to those activities.

- *24/7 mobile crisis services*
- *Crisis stabilization programs offering acute care or subacute care in a hospital or appropriately licensed facility, as determined by such State, with referrals to inpatient or outpatient care.*

*STATE FLEXIBILITY: In lieu of expending 5 percent of the amount the State receives pursuant to this section for a fiscal year to support evidence based programs as required a State may elect to expend not less than 10 percent of such amount to support such programs by the end of two consecutive fiscal years.*

A crisis response system will have the capacity to prevent, recognize, respond, de-escalate, and follow-up from crises across a continuum, from crisis planning, to early stages of support and respite, to crisis stabilization and intervention, to post-crisis follow-up and support for the individual and their family. SAMHSA expects that states will build on the emerging and growing body of evidence for effective community-based crisis-intervention and response systems. Given the multi-system involvement of many individuals with M/SUD issues, the crisis system approach provides the infrastructure to improve care coordination, stabilization service to support reducing distress, promoting skill development and outcomes, manage costs, and better invest resources.

SAMHSA developed [Crisis Services: Meeting Needs, Saving Lives](#), which includes "[National Guidelines for Behavioral Health Crisis Care: Best Practice Toolkit](#)" as well as an [Advisory: Peer Support Services in Crisis Care](#) and other related National Association of State Mental Health Programs Directors (NASMHPD) papers on crisis services. SAMHSA also developed "[National Guidelines for Child and Youth Behavioral Health Crisis Care](#)" which offers best practices, implementation strategies, and practical guidance for the design and development of services that meet the needs of children, youth and their families experiencing a behavioral health crisis. Please note that this set aside funding is dedicated for the core set of crisis services as directed by Congress. Nothing precludes states from utilizing more than 5 percent of its MHBG funds for crisis services for individuals with serious mental illness or children with serious emotional disturbances. If states have other investments for crisis services, they are encouraged to coordinate those programs with programs supported by this new 5 percent set aside. This coordination will help ensure services for individuals are swiftly identified and are engaged in the core crisis care elements.

1. Briefly narrate your state's crisis system. For all regions/areas of your state, include a description of access to the crisis call centers, availability of mobile crisis and behavioral health first responder services, utilization of crisis receiving and stabilization centers.

According to Chapter 65E-14, Florida Administrative Code, Florida's crisis system is composed of crisis stabilization and crisis support/emergency. Crisis stabilization services are acute, intensive residential treatment services offered twenty-four hours per day, seven days per week, that meet the needs of individuals experiencing an acute crisis and who would require hospitalization in the absence of a suitable alternative. Crisis support/emergency services are non-residential care generally available twenty-four hours per day to intervene in a crisis or provide emergency care, such as Mobile Response Teams, the 988 Suicide and Crisis Lifeline, and Crisis Stabilization Units.

Crisis services are available statewide. Crisis Stabilization Units, Mobile Response Teams and the 988 Suicide and Crisis Lifeline are all available in every region of the state.

2. In accordance with the guidelines below, identify the stages where the existing/proposed system will fit in.

a) The **Exploration** stage: is the stage when states identify their communities' needs, assess organizational capacity, identify how crisis services meet community needs, and understand program requirements and adaptation.

b) The **Installation** stage: occurs once the state comes up with a plan and the state begins making the changes necessary to implement the crisis services based

on the SAMHSA guidance. This includes coordination, training and community outreach and education activities.

c) **Initial Implementation** stage: occurs when the state has the three-core crisis services implemented and agencies begin to put into practice the SAMHSA guidelines.

d) **Full Implementation** stage: occurs once staffing is complete, services are provided, and funding streams are in place.

e) **Program Sustainability** stage: occurs when full implementation has been achieved, and quality assurance mechanisms are in place to assess the effectiveness and quality of the crisis services.

b. Briefly explain your stages of implementation selections here.

Someone to Talk to - The 988 Suicide and Crisis Lifeline was implemented in July 2022. Florida has thirteen 988 call centers that cover all 67 counties in the state. The Department continues to build workforce capacity and infrastructure. Going into fiscal year 2024-25, the Department is developing additional policy and guidance, and working on the impact of upcoming geo-location routing which will significantly increase the number of calls to Florida centers due to our large population of individuals moving to Florida from other states, who were previously routed by area code. The current in-state answer rate is 81%, an increase of 27 points since initial rollout, while call volume has increased from an average of twelve thousand calls per month to between fourteen and sixteen thousand. The average speed to answer a call is 33 seconds with some 988 Florida Lifeline centers answering in under 5 seconds. 988 Florida Lifeline data from state fiscal year 2023-24 shows 120,318 calls answered in-state; 1,452 suicide attempts in progress averted; 62,168 referrals to non-acute behavioral health services; 3,428 contacts referred to a Mobile Response Team; and 96% of contacts diverted from higher level crisis care. In state fiscal year 2024-25, the 988 Florida Lifeline is funded through a combination of Community Mental Health Services Block Grant, Substance Use Prevention, Treatment and Recovery Services Block Grant, Bipartisan Safer Communities Act funding, a federal 988 State and Territory Cooperative Agreement Grant, and state general revenue.

Someone to Respond - Mobile Response Teams (MRT) were implemented in 2018 following the Marjorie Stoneman Douglas school shooting. Initial implementation began with 30 teams throughout the state serving individuals 25 and under. Since that time, the Florida Legislature has continued to invest in MRT with increased funding that has allowed the continued expansion of MRT. In state fiscal year 2023-24, Florida had 51 teams serving all ages. In state fiscal year 2024-25, the Legislature approved an additional \$11 million in recurring general revenue that is currently in the allocation process. MRT exists in all regions of the state covering all 67 counties. (Some counties have shared MRT services due to smaller population size.)

Somewhere to Go – Florida has a long established network of Crisis Stabilization Units that are funded through a combination of state, and federal funds, Medicaid, and billing through private insurance.

3. Based on SAMHSA's National Guidelines for Behavioral Health Crisis Care, explain how the state will develop the crisis system.

Florida will continue to contribute state and federal funding to develop and expand access to crisis services, including continued support of the 988 Suicide and Crisis Lifeline, Mobile Response Teams, and Crisis Stabilization Units.

4. Briefly describe the proposed/planned activities utilizing the 5 percent set aside.

The 5-percent set-aside will support Mobile Response Teams, Crisis Stabilization services, and contribute to sustainment of 988 Suicide and Crisis Lifeline call centers in Florida.

### 21. State Planning/Advisory Council and Input on the Mental Health/Substance use disorder Block Grant Application- Required for MHBG

#### Narrative Question

Each state is required to establish and maintain a state Mental Health Planning/Advisory Council to carry out the statutory functions as described in 42 U.S. C. 300x-3 for adults with SMI and children with SED. To meet the needs of states that are integrating services supported by MHBG and SUPTRS BG, SAMHSA is recommending that states expand their Mental Health Advisory Council to include substance misuse prevention, SUD treatment, and recovery representation, referred to here as an Advisory/Planning Council (PC). SAMHSA encourages states to expand their required Council's comprehensive approach by designing and implementing regularly scheduled collaborations with an existing substance misuse prevention, SUD treatment, and recovery advisory council to ensure that the council reviews issues and services for persons with, or at risk, for substance misuse and SUDs. To assist with implementing a PC, SAMHSA has created [Best Practices for State Behavioral Health Planning Councils: The Road to Planning Council Integration](https://www.samhsa.gov/grants/block-grants/resources).<sup>1</sup>

Planning Councils are required by statute to review state plans and implementation reports; and submit any recommended modifications to the state. Planning councils monitor, review, and evaluate, not less than once each year, the allocation and adequacy of mental health services within the state. They also serve as an advocate for individuals with M/SUD problems. SAMHSA requests that any recommendations for modifications to the application or comments to the implementation report that were received from the Planning Council be submitted to SAMHSA, regardless of whether the state has accepted the recommendations. The documentation, preferably a letter signed by the Chair of the Planning Council, should state that the Planning Council reviewed the application and implementation report and should be transmitted as attachments by the state.

<sup>1</sup><https://www.samhsa.gov/grants/block-grants/resources> [samhsa.gov]

#### Please consider the following items as a guide when preparing the description of the state's system:

1. How was the Council involved in the development and review of the state plan and report? Attach supporting documentation (e.g. meeting minutes, letters of support, etc.)

Florida's Substance Abuse and Mental Health Planning and Advisory Council are asked to review and provide questions, comments, concerns, and feedback on all state plans and annual reports submitted to SAMHSA for the CMHS and SUPTRS Block Grants. Council feedback and acknowledgement of the opportunity to review are formally solicited electronically. All feedback is considered for incorporation into drafts of plans and reports before submission.

The Council is also briefed on upcoming and/or recently submitted state plans and reports at quarterly meetings with opportunities to discuss verbally and via email. These post-submission briefings provide a chance to collect additional feedback to inform future processes for developing and completing Block Grant planning and reporting requirements.

2. What mechanism does the state use to plan and implement community mental health treatment, substance misuse prevention, SUD treatment, and recovery support services?

Florida's Substance Abuse and Mental Health Planning Council is an integrated advisory body that helps the Department plan and implement both mental health services and substance abuse prevention, treatments, and recovery support services.

3. Has the Council successfully integrated substance misuse prevention and SUD treatment and recovery or co-occurring disorder issues, concerns, and activities into its work? ☒ Yes ☐ No

4. Is the membership representative of the service area population (e.g. ethnic, cultural, linguistic, rural, suburban, urban, older adults, families of young children)? ☒ Yes ☐ No

5. Please describe the duties and responsibilities of the Council, including how it gathers meaningful input from people in recovery, families, and other important stakeholders, and how it has advocated for individuals with SMI or SED.

The Planning Council reviews the Department's Block Grant applications, plans, and reports, and makes recommendations on modifications. The Planning Council also monitors, reviews, and evaluates, the allocation and adequacy of mental health services within Florida. The Council advocates for individuals and families through local and statewide efforts. Council members act as a liaison between state and Managing Entities in promoting a recovery-oriented system of care. The Council advises the Department on allocation of services and creating a plan that supports the treatments and supports for recovery and a life in the community.

*Please indicate areas of technical assistance needed related to this section.*

State staff will be working with the Council to assess any specific TA needs.

### 23. Syringe Services Program (SSP) - Required if planning for approved use of SUBG Funding for SSP in FY 25

Planning Period Start Date: 7/1/2024 Planning Period End Date: 6/30/2025

#### Narrative Question:

The Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUPTRS BG) restriction<sup>1,2</sup> on the use of federal funds for programs distributing sterile needles or syringes (referred to as syringe services programs (SSP)) was modified by the [Consolidated Appropriations Act, 2018](#) (P.L. 115-141) signed by President Trump on March 23, 2018<sup>3</sup>.

Section 520. *Notwithstanding any other provisions of this Act, no funds appropriated in this Act shall be used to purchase sterile needles or syringes for the hypodermic injection of any illegal drug: Provided, that such limitation does not apply to the use of funds for elements of a program other than making such purchases if the relevant State or local health department, in consultation with the Centers for Disease Control and Prevention, determines that the State or local jurisdiction, as applicable, is experiencing, or is at risk for, a significant increase in hepatitis infections or an HIV outbreak due to injection drug use, and such program is operating in accordance with State and local law.*

A state experiencing, or at risk for, a significant increase in hepatitis infections or an HIV outbreak due to injection drug use, (as determined by CDC), may propose to use SUPTRS BG to fund elements of an SSP other than to purchase sterile needles or syringes. States interested in directing SUPTRS BG funds to SSPs must provide the information requested below and receive approval from the State Project Officer. Please note that the term used in the SUPTRS BG statute and regulation, *intravenous drug user* (IVDU) is being replaced for the purposes of this discussion by the term now used by the federal government, *persons who inject drugs* (PWID).

States may consider making SUPTRS BG funds available to either one or more entities to establish elements of a SSP or to establish a relationship with an existing SSP. States should keep in mind the related PWID SUPTRS BG authorizing legislation and implementing regulation requirements when developing its Plan, specifically, requirements to provide outreach to PWID, SUD treatment and recovery services for PWID, and to routinely collaborate with other healthcare providers, which may include HIV/STD clinics, public health providers, emergency departments, and mental health centers<sup>4</sup>. SAMHSA funds cannot be supplanted, in other words, used to fund an existing SSP so that state or other non-federal funds can then be used for another program.

In the first half of calendar year 2016, the federal government released three guidance documents regarding SSPs<sup>5</sup>: These documents can be found on the Hiv.gov website: <https://www.hiv.gov/federal-response/policies-issues/syringe-services-programs>.

1. **Department of Health and Human Services Implementation Guidance to Support Certain Components of Syringe Services Programs, 2016** from The US Department of Health and Human Services, Office of HIV/AIDS and Infectious Disease Policy <https://www.samhsa.gov/sites/default/files/grants/ssp-guidance-for-hiv-grants.pdf>,
2. **Centers for Disease Control and Prevention (CDC) Program Guidance for Implementing Certain Components of Syringe Services Programs, 2016** The Centers for Disease Control and Prevention, National Center for HIV/AIDS, Viral Hepatitis, STD and TB Prevention, Division of Hepatitis Prevention <http://www.cdc.gov/hiv/pdf/risk/cdc-hiv-syringe-exchange-services.pdf>,
3. **The Substance Abuse and Mental Health Services Administration (SAMHSA)-specific Guidance for States Requesting Use of Substance Abuse Prevention and Treatment Block Grant Funds to Implement SSPs** <http://www.samhsa.gov/sites/default/files/grants/ssp-guidance-state-block-grants.pdf>,

Please refer to the guidance documents above and follow the steps below when requesting to direct FY 2021 funds to SSPs.

- **Step 1** - Request a Determination of Need from the CDC
- **Step 2** - Include request in the FFY 2021 Mini-Application to expend FFY 2020 - 2021 funds and support an existing SSP or establish a new SSP
  - Include proposed protocols, timeline for implementation, and overall budget
  - Submit planned expenditures and agency information on Table A listed below
- **Step 3** - Obtain State Project Officer Approval

Future years are subject to authorizing language in appropriations bills.

## End Notes

<sup>1</sup> Section 1923 (b) of Title XIX, Part B, Subpart II of the PHS Act (42 U.S.C. § 300x-23(b)) and 45 CFR § 96.126(e) requires entities that receive SUPTRS BG funds to provide substance use disorder (SUD) treatment services to PWID to also conduct outreach activities to encourage such persons to undergo SUD treatment. Any state or jurisdiction that plans to re-obligate FY 2020-2021 SUPTRS BG funds previously made available such entities for the purposes of providing substance use disorder treatment services to PWID and outreach to such persons may submit a request via its plan to SAMHSA for the purpose of incorporating elements of a SSP in one or more such entities insofar as the plan request is applicable to the FY 2020-2021 SUPTRS BG funds **only** and is consistent with guidance issued by SAMHSA.

<sup>2</sup> Section 1931(a)(1)(F) of Title XIX, Part B, Subpart II of the Public Health Service (PHS) Act (42 U.S.C. § 300x-31(a)(1)(F)) and 45 CFR § 96.135(a) (6) explicitly prohibits the use of SUPTRS BG funds to provide PWID with hypodermic needles or syringes so that such persons may inject illegal drugs unless the Surgeon General of the United States determines that a demonstration needle exchange program would be effective in reducing injection drug use and the risk of HIV transmission to others. On February 23, 2011, the Secretary of the U.S. Department of Health and Human Services published a notice in the [Federal Register](#) (76 FR 10038) indicating that the Surgeon General of the United States had made a determination that syringe services programs, when part of a comprehensive HIV prevention strategy, play a critical role in preventing HIV among PWID, facilitate entry into SUD treatment and primary care, and do not increase the illicit use of drugs.

<sup>3</sup> Division H Departments of Labor, Health and Human Services and Education and Related Agencies, Title V General Provisions, Section 520 of the Consolidated Appropriations Act, 2018 (P.L. 115-141)

<sup>4</sup> Section 1924(a) of Title XIX, Part B, Subpart II of the PHS Act (42 U.S.C. § 300x-24(a)) and 45 CFR § 96.127 requires entities that receives SUPTRS BG funds to routinely make available, directly or through other public or nonprofit private entities, tuberculosis services as described in section 1924(b)(2) of the PHS Act to each person receiving SUD treatment and recovery services.

Section 1924(b) of Title XIX, Part B, Subpart II of the PHS Act (42 U.S.C. § 300x-24(b)) and 45 CFR 96.128 requires "designated states" as defined in Section 1924(b)(2) of the PHS Act to set- aside SUPTRS BG funds to carry out 1 or more projects to make available early intervention services for HIV as defined in section 1924(b)(7)(B) at the sites at which persons are receiving SUD treatment and recovery services.

Section 1928(a) of Title XXI, Part B, Subpart II of the PHS Act (42 U.S.C. 300x-28(c)) and 45 CFR 96.132(c) requires states to ensure that substance abuse prevention and SUD treatment and recovery services providers coordinate such services with the provision of other services including, but not limited to, health services.

<sup>5</sup> ***Department of Health and Human Services Implementation Guidance to Support Certain Components of Syringe Services Programs, 2016*** describes an SSP as a comprehensive prevention program for PWID that includes the provision of sterile needles, syringes and other drug preparation equipment and disposal services, and some or all the following services:

- Comprehensive HIV risk reduction counseling related to sexual and injection and/or prescription drug misuse;
- HIV, viral hepatitis, sexually transmitted diseases (STD), and tuberculosis (TB) screening;
- Provision of naloxone (Narcan?) to reverse opiate overdoses;
- Referral and linkage to HIV, viral hepatitis, STD, and TB prevention care and treatment services;
- Referral and linkage to hepatitis A virus and hepatitis B virus vaccinations; and
- Referral to SUD treatment and recovery services, primary medical care and mental health services.

Centers for Disease Control and Prevention (CDC) Program Guidance for Implementing Certain Components of Syringe Services Programs, 2016 includes a [description of the elements of an SSP](#) that can be supported with federal funds.

- Personnel (e.g., program staff, as well as staff for planning, monitoring, evaluation, and quality assurance);
- Supplies, exclusive of needles/syringes and devices solely used in the preparation of substances for illicit drug injection, e.g., cookers;
- Testing kits for HCV and HIV;
- Syringe disposal services (e.g., contract or other arrangement for disposal of bio- hazardous material);
- Navigation services to ensure linkage to HIV and viral hepatitis prevention, treatment and care services, including antiretroviral therapy for HCV and HIV, pre-exposure prophylaxis, post-exposure prophylaxis, prevention of mother to child transmission and partner services; HAV
