

REGIONAL BEHAVIORAL HEALTH INTERAGENCY COLLABORATION

Jessica Durant, Regional Operations Manager
Florida Department of Children and Families

Devona Pickle, Chief of Medicaid Policy
Agency for Healthcare Administration

September 2025

BACKGROUND

The Commission on Mental Health and Substance Use Disorder (Commission) presented their Annual Interim Report on January 1, 2024, with findings and evidence-based recommendations.

To strengthen community networks and cross-agency collaboration, the Commission recommended establishing regional collaboratives.

On July 1, 2024, House Bill 7021 created section 394.90826, Florida Statutes to establish Behavioral Health Interagency Collaboratives throughout the state in support of this recommendation.

“By uniting voices across our behavioral health system, the Behavioral Health Interagency Collaboration empowers communities to create smarter, more connected solutions that improve access and quality of care at the local level.”

VISION AND OBJECTIVES

The vision of the regional collaboratives is to:

- Identify and address ongoing opportunities within the behavioral health system at the local level.
- Improve the accessibility, availability, and quality of behavioral health services.

The objectives of the regional collaboratives are to:

- Facilitate enhanced interagency communication and collaboration.
- Develop and promote regional strategies tailored to address community-level challenges in the behavioral health system.

FOUR KEY AREAS

**Strengthening Community Networks
and Cross-Agency Collaboration**

Enhancing Crisis Care Continuum

**Improving Data Collection and
Management Processes**

**Optimizing the Financial
Management of the Behavioral
Health System of Care**
