3. Pending Enhancements

- 2022.07.0 – **TENTATIVE** List of Enhancements

    o WI 538474 – Allow Configuration of Validation Rules

        o FEI will update the Business Rules Workspace to include parameters for Effective date and Expiration Date based on the data set comparison date.

        o FEI will also update the Rule Collection Window to display the new parameters as columns. Note: Fields will not be editable from the Rule Collection Window

    o WI 542905 – Consolidate FASAMS Versions

        o FEI will consolidate the FASAMS versions into a single database

    o WI 570813 – Make LevelCode Optional for LOF

        o FEI will update the business rules whereby submissions of Actual and Recommended Level Codes are optional for Level of Functioning (LOF) evaluations but remain required for Level of Care (LOC) evaluations.

- 2022.10.0 – **TENTATIVE** List of Enhancements

    o WI 546000 – Convert FASAMS to AWS Serverless

        o FEI will convert FASAMS to AWS Serverless for job processing. The serverless job processor uses Lambda functions, and more Lambda functions can be dynamically added when more processing power is needed based on submission load.

    o WI 568459 – Add Skip Logic for Duplicate Data Set Records

        o FEI will add skip logic for duplicate data set records, whereby business validation rules will not be performed against an entire data set record when

the submitted record values match exactly what is currently stored in the database. For example: The skip logic would be triggered for a TreatmentEpisode record if the 'ProviderTreatmentEpisode' entity values and **ALL** values in **ALL** subentities are unchanged from the values stored in the database.
